"My stay here in Cholula studying at UDLAP has been the greatest time span of my life. That is because I was provided with one of the best campuses in the world, a great working environment, and overall a highly pleasant experience. The gym, the piano room, and the richly equipped labs were the spaces I most frequently used and highly appreciated. The classes I took were very diverse and I learned a lot due to the tendency to practice in every course. It was the best decision to come to Mexico, and especially to UDLAP."
